

SECURITIES AND EXCHANGE COMMISSION

SEC FORM 17-Q

QUARTERLY REPORT PURSUANT TO SECTION 17 OF THE SECURITIES REGULATION CODE
AND SRC RULE 17(2)(b) THEREUNDER

1. For the quarterly period ended: **31 March 2016**
2. Commission identification number: **PW-998 3**. BIR Tax Identification No: **000-410-269**
4. Exact name of issuer as specified in its charter: **MACAY HOLDINGS, INC.**
5. Province, country or other jurisdiction of incorporation or organization
Securities and Exchange Commission, Mandaluyong City, Metro Manila, Philippines
6. Industry Classification Code: (SEC Use Only)
7. Address of issuer's principal office Postal Code
137 Yakal Street, San Antonio Village, Makati City **1203**
8. Issuer's telephone number, including area code: **(632)893-0733**
9. Former name, former address and former fiscal year, if changed since last report

MAYBANK ATR KIM ENG FINANCIAL CORPORATION

10. Securities registered pursuant to Sections 8 and 12 of the Code, or Sections 4 and 8 of the RSA

Title of each Class	Number of Shares of common Stock Outstanding	Amount of debt outstanding (Unpaid Subscription)
Common Share	1,068,393,223	None

11. Are any or all of the securities listed on a Stock Exchange?

Yes No

If yes, state the name of such Stock Exchange and the class/es of securities listed therein:

THE PHILIPPINE STOCK EXCHANGE, INC.

12. Indicate by check mark whether the registrant:

(a) has filed all reports required to be filed by Section 17 of the Code and SRC Rule 17 thereunder or Sections 11 of the RSA and RSA Rule 11(a)-1 thereunder, and Sections 26 and 141 of the Corporation Code of the Philippines, during the preceding twelve (12) months (or for such shorter period the registrant was required to file such reports)

Yes No

(b) Has been subject to such filing requirements for the past ninety (90) days.

Yes No

PART I--FINANCIAL INFORMATION

Item 1. Financial Statements.

MACAY HOLDINGS, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED INTERIM FINANCIAL STATEMENTS

1. Corporate Information

Macay Holdings, Inc. (the Parent Company or MHI) is a company incorporated in the Philippines and registered with the Philippine Securities and Exchange Commission (SEC) on October 16, 1930 primarily to reflect the business of a holding company. Under its amended Articles of Incorporation, the corporate life of the Parent Company was extended for another 50 years up to October 16, 2030. The shares of stock of Macay Holdings, Inc. are listed and traded as "MACAY" on the Philippine Stock Exchange (PSE) starting 2013. The Parent Company owns 100% interest and operates as the holding company of ARC Refreshments Corporation (ARC Refreshments), a beverage company and ARC Holdings, Inc. (ARCHI), a holding company.

The registered office address and principal place of business of the Parent Company is 137 Yakal Street, San Antonio Village, Makati City.

The Parent Company and its subsidiaries are collectively referred to in the notes to the consolidated financial statements as the "Group".

Change in Ownership

On September 24, 2013, Mazy's Capital, Inc. (MCI, a Filipino corporation) and Maybank Kim Eng Holdings Limited (MKEHL) signed a Share Purchase Agreement (the Agreement), wherein MCI purchased all of the issued common shares held by MKEHL totaling to 958,923,466 shares, representing an 89.75% stake in the Parent Company (the Sale Shares), for the purchase price of ₱3.3298 per share (with the purchase transaction referred to as the Acquisition). Among the conditions for such acquisition was the sale for cash of substantially all of the assets of the Parent Company to Maybank ATR KE Capital, which assets included the Parent Company's shareholdings in its subsidiaries, AsianLife and General Assurance Corporation and ATR KE Land. Consequently, these subsidiaries, which made up the former businesses of the Parent Company, were sold to Maybank ATR KE Capital. Total consideration for the Acquisition amounted to ₱3.19 billion. The transaction was executed in the PSE on October 25, 2013 (start of common control). As a result, the Parent Company retained mostly only cash and receivables as its assets, with the latter consisting almost entirely of amounts due from the sale.

MCI is 42.86% owned by Mega Asia Bottling Corporation (Mega Asia) and 57.14% owned by Zest-O Corporation (Zest-O). Mega Asia is an entity under common control while Zest-O is the ultimate parent company of the Group.

On December 3, 2013, the Board of Directors (BOD) approved the change of the trading symbol of the Parent Company's shares in the PSE from "MAKE" to "MACAY". On the same date, the shareholders of the Parent Company approved the change in its corporate name from Maybank ATR Kim Eng Financial Corporation to Macay Holdings, Inc. The SEC approved the amended articles of incorporation for the Parent Company's change in corporate name on January 27, 2014.

Investment in New Business

On November 18, 2013, the Parent Company, through its BOD, approved the investment in a food and beverage company. On December 3, 2013, the SEC approved the incorporation of ARC Refreshments, of which the Parent Company has 100.00% ownership.

ARC Refreshments is primarily engaged in the business of trading of goods such as beverages on wholesale bases and to operate, conduct, and maintain the business of manufacturing, importing, buying, selling, handling, bottling, distribution, trading, or otherwise dealing in, at wholesale and, to the extent allowed by law, drinks and other containers or dispensers and other related goods of whatever nature, and any and all materials, supplies, and other goods used or employed in or related to the manufacture of such finished products.

On December 27, 2013, the BOD of ARC Refreshments approved (a) the acquisition of substantially the operating assets of Mega Asia consisting of machinery and equipment used in its bottling operations and (b) the acquisition of substantially all of the operating assets of Asiawide Refreshments Corporation (Asiawide) consisting of machinery and equipment, bottles, inventories, receivables and other assets and the assumption of some liabilities incurred in the normal course of business.

On January 31, 2014, ARC Refreshments executed the Asset Purchase Agreements (APAs) with Mega Asia and Asiawide. The carrying values of the net assets transferred as of January 31, 2014 amounted to ₱1.0 billion and ₱0.57 billion from Asiawide and Mega Asia, respectively.

On June 26, 2014, the Parent Company through its BOD, approved the additional investment in ARC Refreshments amounting to 190 million shares at ₱10 per share for a total investment of ₱1,900 million.

On August 13, 2015, the Parent Company executed a Share Purchase Agreement with all shareholders of ARCHI. ARCHI is the holder of the trademark of Royal Crown Cola, Inc. (RCCI), owner of the RC Cola brand. The purpose of the acquisition is to consolidate all the licensing, trademark and related rights on the RC Cola brand. All issued and outstanding common shares totalling 1.70 million shares shall be purchased by the Parent Company at ₱10 per share for a total consideration of ₱17.00 million. As of December 31, 2015, the consideration remains unpaid.

2. Basis of Preparation, Statement of Compliance and Summary of Significant Accounting Policies

Basis of Preparation

The accompanying financial statements have been prepared using the historical cost basis. These financial statements are presented in Philippine peso (₱), which is the Group's functional currency. All amounts are rounded off to the nearest ₱, except when otherwise indicated.

Statement of Compliance

The consolidated financial statements have been prepared in accordance with Philippine Financial Reporting Standards (PFRS).

Changes in Accounting Policies and Disclosures

New and Amended Standards and Interpretations and Improved PFRS Adopted in Calendar Year 2013

The accounting policies adopted are consistent with those of the previous financial year, except for the adoption of the following new and amended standards and Philippine Interpretations from International Financial Reporting Interpretations Committee (IFRIC) and improved PFRS which the Group has adopted starting January 1, 2013. Unless otherwise indicated, the adoption did not have any significant impact on the financial statements of the Group.

- **Amendment to Philippine Accounting Standards 1, *Presentation of Financial Statements Presentation of items of other comprehensive income***
The amendments to PAS 1 change the grouping of items presented in statements of comprehensive income. Items that could be reclassified (or "recycled") to profit or loss at a future point in time (i.e., upon derecognition or settlement) would be presented separately from items that will never be reclassified. The amendment affects presentation only and has no impact on the Group's financial position or performance.
- **PFRS 7, *Financial Instruments: Disclosures - Offsetting Financial Assets and Financial Liabilities (Amendments)***
- **PFRS 10, *Consolidated Financial Statements***
- **PFRS 11, *Joint Arrangements***
- **PFRS 12, *Disclosure of Interests in Other Entities***
- **PFRS 13, *Fair Value Measurement***
- **Revised PAS 27, *Separate Financial Statements***

- **Revised PAS 28, *Investments in Associates and Joint Ventures***
- **Amendments to PFRS 1, *First-time Adoption of PFRS - Government Loans***
- **Philippine Interpretation IFRIC 20, *Stripping Costs in the Production Phase of a Surface Mine***

Improvements to PFRS

The *Annual Improvements to PFRS* (2009-2011 cycle) contain non-urgent but necessary amendments to the following standards:

- **PFRS 1, *First-time Adoption of PFRS - Borrowing Costs***
- **PFRS 1, *First-time Adoption of PFRS - Repeated Application of PFRS 1***
- **PAS 16, *Property, Plant and Equipment - Classification of Servicing Equipment***
- **PAS 32, *Financial Instruments: Presentation - Tax Effect of Distribution to Holders of Equity Instruments***
- **PAS 34, *Interim Financial Reporting - Interim Financial Reporting and Segment Information for Total Assets and Liabilities***
- **PAS 1, *Presentation of Financial Statements - Clarification of the Requirements for Comparative Information***

Revised PAS 19, *Employee Benefits*

Amendments to PAS 19 range from fundamental changes such as removing the corridor mechanism and the concept of expected returns on plan assets to simple clarifications and rewording. The revised standard also requires new disclosures such as, among others, a sensitivity analysis for each significant actuarial assumption, information on asset-liability matching strategies, duration of the defined benefit obligation, and disaggregation of plan assets by nature and risk. On January 1, 2013, the Group adopted the Revised PAS 19, *Employee Benefits*.

For defined benefit plans, the Revised PAS 19 requires all actuarial gains and losses to be recognized in other comprehensive income and unvested past service costs previously recognized over the average vesting period to be recognized immediately in statement of comprehensive income when incurred.

Prior to 2013, actuarial gains and losses are measured using the 10% corridor approach wherein actuarial gains and losses are recognized in income when the net cumulative unrecognized actuarial gains and losses for the retirement plan at the end of the previous reporting period exceeded 10% of the higher of the defined benefit obligation and the fair value of the plan assets at that date. These gains and losses are recognized over the remaining estimated working lives of the employees participating in the plan.

Starting 2013, the Group recognized all actuarial gains and losses immediately in other comprehensive income as they occur. This change in accounting policy which is aligned with one of the requirements of Revised PAS 19 is accounted for retroactively. However, the adoption of Revised PAS 19 did not have significant impact on the Group's equity as of December 31, 2012 and 2011, and to the Group's comprehensive income and cash flows for the years ended December 31, 2012 and 2011.

New Accounting Standards, Interpretations and Amendments Effective Subsequent to December 31, 2013

The Group will adopt the following standards and interpretations enumerated below when these become effective. Except as otherwise indicated, the Group does not expect the adoption of these new, revised and amended PFRS, PAS and IFRIC to have a significant impact on its financial statements.

Amendments to PAS 36, *Impairment of Assets - Recoverable Amount Disclosures for Non-Financial Assets*

These amendments remove the unintended consequences of PFRS 13 on the disclosures required under PAS 36. In addition, these amendments require disclosure of the recoverable amounts for the assets or cash-generating units (CGUs) for which impairment loss has been recognized or reversed during the period. These amendments are effective retrospectively for annual periods beginning on or after January 1, 2014 with earlier application permitted, provided PFRS 13 is also applied. The amendments have no impact on the Group's financial position or performance.

Investment Entities (Amendments to PFRS 10, PFRS 12 and PAS 27)

These amendments are effective for annual periods beginning on or after January 1, 2014. They provide an exception to the consolidation requirement for entities that meet the definition of an investment entity under PFRS 10. The exception to consolidation requires investment entities to account for subsidiaries at fair value through profit or loss (FVPL).

Philippine Interpretation IFRIC 21, Levies

IFRIC 21 clarifies that an entity recognizes a liability for a levy when the activity that triggers payment, as identified by the relevant legislation, occurs. For a levy that is triggered upon reaching a minimum threshold, the interpretation clarifies that no liability should be anticipated before the specified minimum threshold is reached. IFRIC 21 is effective for annual periods beginning on or after January 1, 2014.

Amendments to PAS 39, Financial Instruments: Recognition and Measurement – Novation of Derivatives and Continuation of Hedge Accounting

These amendments provide relief from discontinuing hedge accounting when novation of a derivative designated as a hedging instrument meets certain criteria. These amendments are effective for annual periods beginning on or after January 1, 2014.

Amendments to PAS 32, Financial Instruments: Presentation - Offsetting Financial Assets and Financial Liabilities

These amendments to PAS 32 clarify the meaning of “currently has a legally enforceable right to set-off” and also clarify the application of the PAS 32 offsetting criteria to settlement systems (such as central clearing house systems) which apply gross settlement mechanisms that are not simultaneous. While the amendment is expected not to have any impact on the net assets of the Group, any changes in offsetting is expected to impact leverage ratios and regulatory capital requirements. The amendments to PAS 32 are to be retrospectively applied for annual periods beginning on or after January 1, 2014.

Effective in 2015:

Amendments to PAS 19, Employee Benefits - Defined Benefit Plans: Employee Contributions

The amendments apply to contributions from employees or third parties to defined benefit plans. Contributions that are set out in the formal terms of the plan shall be accounted for as reductions to current service costs if they are linked to service or as part of the remeasurements of the net defined benefit asset or liability if they are not linked to service. Contributions that are discretionary shall be accounted for as reductions of current service cost upon payment of these contributions to the plans. The amendments to PAS 19 are to be retrospectively applied for annual periods beginning on or after July 1, 2014.

Improvements to PFRS

The *Annual Improvements to PFRSs* (2010-2012 cycle) contain non-urgent but necessary amendments to the following standards:

- **PFRS 2, Share-based Payment - Definition of Vesting Condition**
- **PFRS 3, Business Combinations - Accounting for Contingent Consideration in a Business Combination**
- **PFRS 8, Operating Segments - Aggregation of Operating Segments and Reconciliation of the Total of the Reportable Segments' Assets to the Entity's Assets**
- **PFRS 13, Fair Value Measurement - Short-term Receivables and Payables**
- **PAS 16, Property, Plant and Equipment - Revaluation Method - Proportionate Restatement of Accumulated Depreciation**
- **PAS 24, Related Party Disclosures - Key Management Personnel**
- **PAS 38, Intangible Assets - Revaluation Method - Proportionate Restatement of Accumulated Amortization**

The *Annual Improvements to PFRSs* (2011-2013 cycle) contain non-urgent but necessary amendments to the following standards:

- **PFRS 1, *First-time Adoption of Philippine Financial Reporting Standards - Meaning of Effective PFRSs***
- **PFRS 3, *Business Combinations - Scope Exceptions for Joint Arrangements***
- **PFRS 13, *Fair Value Measurement - Portfolio Exception***
- **PAS 40, *Investment Property***

No Mandatory Effectivity:

PFRS 9, *Financial Instruments*

PFRS 9, as issued, reflects the first and third phases of the project to replace PAS 39 and applies to the classification and measurement of financial assets and liabilities and hedge accounting, respectively. Work on the second phase, which relate to impairment of financial instruments, and the limited amendments to the classification and measurement model is still ongoing, with a view to replace PAS 39 in its entirety. PFRS 9 requires all financial assets to be measured at fair value at initial recognition. A debt financial asset may, if the fair value option (FVO) is not invoked, be subsequently measured at amortized cost if it is held within a business model that has the objective to hold the assets to collect the contractual cash flows and its contractual terms give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal outstanding. All other debt instruments are subsequently measured at FVPL. All equity financial assets are measured at fair value either through other comprehensive income (OCI) or profit or loss. Equity financial assets held for trading must be measured at FVPL. For liabilities designated as at FVPL using the fair value option, the amount of change in the fair value of a liability that is attributable to changes in credit risk must be presented in OCI. The remainder of the change in fair value is presented in profit or loss, unless presentation of the fair value change relating to the entity's own credit risk in OCI would create or enlarge an accounting mismatch in profit or loss. All other PAS 39 classification and measurement requirements for financial liabilities have been carried forward to PFRS 9, including the embedded derivative bifurcation rules and the criteria for using the FVO. The adoption of the first phase of PFRS 9 will have an effect on the classification and measurement of the Group's financial assets, but will potentially have no impact on the classification and measurement of financial liabilities.

On hedge accounting, PFRS 9 replaces the rules-based hedge accounting model of PAS 39 with amore principles-based approach. Changes include replacing the rules-based hedge effectiveness test with an objectives-based test that focuses on the economic relationship between the hedged item and the hedging instrument, and the effect of credit risk on that economic relationship; allowing risk components to be designated as the hedged item, not only for financial items, but also for non-financial items, provided that the risk component is separately identifiable and reliably measurable; and allowing the time value of an option, the forward element of a forward contract and any foreign currency basis spread to be excluded from the designation of a financial instrument as the hedging instrument and accounted for as costs of hedging. PFRS 9 also requires more extensive disclosures for hedge accounting.

PFRS 9 currently has no mandatory effective date. PFRS 9 may be applied before the completion of the limited amendments to the classification and measurement model and impairment methodology. The Group will not adopt the standard before the completion of the limited amendments and the second phase of the project.

Deferred Effectivity:

Philippine Interpretation IFRIC 15, *Agreements for the Construction of Real Estate*

This interpretation covers accounting for revenue and associated expenses by entities that undertake the construction of real estate directly or through subcontractors. The interpretation requires the revenue on construction of real estate be recognized only upon completion, except when such contract qualifies as construction contract to be accounted for under PAS 11, *Construction Contracts*, or involves rendering of services in which case revenue is recognized based on the stage of completion. Contracts involving provision of services with the construction materials and where the risks and reward of ownership are transferred to the buyer on a continuous basis will also be accounted for based on stage of completion. The Philippine SEC and the Financial Reporting

Standards Council have deferred the effectivity of this interpretation until the final revenue standard is issued by International Accounting Standards Board and an evaluation of the requirements of the final revenue standard against the practices of the Philippine real estate industry is completed.

Improvements to PFRS

The *Annual Improvements to PFRSs* (2010-2012 cycle) contain non-urgent but necessary amendments to the following standards:

- **PFRS 2, Share-based Payment - Definition of Vesting Condition**
- **PFRS 3, Business Combinations - Accounting for Contingent Consideration in a Business Combination**
- **PFRS 8, Operating Segments - Aggregation of Operating Segments and Reconciliation of the Total of the Reportable Segments' Assets to the Entity's Assets**
- **PFRS 13, Fair Value Measurement - Short-term Receivables and Payables**

- **PFRS 1, First-time Adoption of Philippine Financial Reporting Standards – Meaning of 'Effective PFRSs'**
- **PFRS 3, Business Combinations - Scope Exceptions for Joint Arrangements**
- **PFRS 13, Fair Value Measurement - Portfolio Exception**
- **PAS 40, Investment Property**

Summary of Significant Accounting Policies

Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

Sale of Goods

Revenue from the sale of goods is recognized when the risks and rewards of ownership of the goods have passed to the buyer, usually on delivery of the goods. Revenue recognized is net of trade deals and pick-up discounts.

Tolling Revenues

Revenue from tolling services is recognized when the service has been rendered.

Interest Income

Interest income is recognized as it accrues using the effective interest rate (EIR) method.

Other Income

Other income is recognized when earned.

Cost and Expense Recognition

Costs and expenses are decreases in economic benefits during the accounting period in the form of outflows or depletions of assets or incurrance of liabilities that result in decreases in equity, other than those relating to distributions to equity participants. Cost and expenses are generally recognized when the expense arises following the accrual basis of accounting.

Cost of Sales

Cost of sales, which comprise mainly of purchases of raw materials and production cost, are recognized when incurred.

Selling and Marketing Expenses

Selling and marketing expenses consist of costs associated with the development and execution of marketing promotion activities and all expenses connected with selling, servicing and distributing Group products and items purchased for resale. Selling and marketing expenses are generally recognized when the service is incurred or the expense arises.

General and Administrative Expenses

General and administrative expenses are incurred in the normal course of business and are generally recognized when the services are used or expenses arise.

Cash

Cash includes cash on hand and cash with banks earn interest at floating rates based on daily bank deposit rates.

Financial Instruments

Financial instruments are recognized in the statement of financial position when the Group becomes a party to the contractual provisions of the instrument. In the case of a regular way purchase or sale of financial assets, recognition and derecognition, as applicable, is done using trade date accounting. Financial instruments are recognized initially at fair value (in the case of an asset) or received (in the case of a liability). The initial measurement of financial instruments, except for those classified as at FVPL, includes transaction cost.

The Group classifies its financial assets in the following categories: financial assets at FVPL, held-to-maturity (HTM) financial assets, loans and receivables and AFS financial assets. The Group classifies its financial liabilities as financial liabilities at FVPL and other financial liabilities. The classification depends on the purpose for which the financial assets were acquired or liabilities incurred and whether they are quoted in an active market. Management determines the classification of its financial assets and liabilities at initial recognition and, where allowed and appropriate, re-evaluates such designation at every financial reporting date. As of March 31, 2016 and December 31, 2015, the Group has no AFS financial assets, financial assets at FVPL, HTM financial assets and financial liabilities at FVPL.

Financial instruments are classified as liabilities or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability are reported as expense or income. Distributions to holders of financial instruments classified as equity are charged directly to equity, net of any related income tax benefits.

“Day 1” Difference

Where the transaction price in a non-active market is different from the fair value from other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Group recognizes the difference between the transaction price and fair value (a “Day 1” difference) in the statement of comprehensive income unless it qualifies for the recognition as some other type of asset. In cases where data which is not observable is used, the difference between the transaction price and model value is only recognized in the statement of comprehensive income when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the “Day 1” difference amount.

Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are not entered into with the intention of immediate or short-term resale and are not classified as financial assets held for trading, designated as AFS financial assets or designated at FVPL. This accounting policy relates to the Group’s “Cash and cash equivalents”, “Trade and other receivables” and “Deposits with suppliers” accounts.

Loans and receivables are recognized initially at fair value, which normally pertains to the billable amount. After initial measurement, loans and receivables are measured at amortized cost using the EIR method, less allowance for impairment losses. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the EIR. The amortization, if any, is included in interest income under "Interest income" account in the statement of comprehensive income. The losses arising from impairment of receivables are recognized in the statement of comprehensive income under "General and administrative expenses" account. The level of allowance for impairment losses is evaluated by management on the basis of factors that affect the collectability of accounts (see accounting policy on Impairment of Financial Assets Carried at Amortized Cost).

Loans and receivables are classified as current assets when they are expected to be realized within 12 months from the reporting date or within the normal operating cycle, whichever is longer. Otherwise, these are classified as noncurrent assets.

Other Financial Liabilities

Issued financial instruments or their components, which are not classified as at FVPL are classified as other financial liabilities, where the substance of the contractual arrangement results in the Group having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares. The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole the amount separately determined as the fair value of the liability component on the date of issue. Other financial liabilities are initially recorded at fair value, less directly attributable transaction costs. After initial measurement, other financial liabilities are measured at amortized cost using the EIR method.

Amortized cost is calculated by taking into account any discount or premium on the issue and fees that are an integral part of the EIR. Any effects of restatement of foreign currency-denominated liabilities, if any, are recognized in "Foreign exchange loss (gain)" account in the statements of comprehensive income.

Other financial liabilities are classified as current liabilities when they are expected to be settled within 12 months from the reporting date or when the Group has an unconditional right to defer settlement for at least twelve months from reporting date. Otherwise, they are classified as noncurrent liabilities.

This accounting policy applies primarily to the Group's "Trade and other payables" and "Short-term loans payable" accounts that meet the above definition (other than liabilities covered by other accounting standards, such as income tax payable and retirement liability).

Impairment of Financial Assets Carried at Amortized Cost

The Group assesses at each reporting date whether a financial asset or group of financial assets is impaired. A financial asset or group of financial asset is deemed impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has or have occurred after initial recognition of the asset (an incurred "loss event") and that loss has an impact on the estimated future cash flows of the financial asset or the group of financial asset that can be reliably estimated. Objective evidence of impairment may include indications that borrower is experiencing significant financial difficulty, default or delinquency reorganization and where observable data indicate that there is measurable decrease in the estimated future cash flows, such as charges in arrear or economic condition that correlate with default.

The Group first assesses whether an objective evidence of impairment exists individually for financial assets that are individually significant, and collectively for financial assets that are not individually significant. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss on receivables carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the assets' carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original EIR (i.e., the EIR computed at initial recognition). The carrying amount of the asset shall be reduced either directly or through the use of an allowance account. The amount of the loss shall be recognized in the statement of comprehensive income.

In relation to receivables, a provision for impairment is made when there is objective evidence (such as the probability of insolvency or significant financial difficulties of the debtor) that the Group will not be able to collect all of the amounts due under the original terms of the invoice. Impaired receivables are derecognized when they are assessed as uncollectible. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. Any subsequent reversal of an impairment loss is recognized in the statement of comprehensive income, to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

Derecognition of Financial Instruments

Financial Asset

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized when:

1. the rights to receive cash flows from the asset have expired;
2. the Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a "pass-through" arrangement; or,
3. the Group has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Group has transferred its rights to receive cash flows from an asset and has entered into a "pass through" arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Group's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Financial Liability

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or has expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in statement of comprehensive income.

Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amount and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the statement of financial position.

Inventories

Inventories are valued at the lower of cost and net realizable value (NRV). Cost is determined using the moving-average method and includes expenditures incurred in bringing the materials and supplies to their existing location and condition. NRV is the estimated selling price in the ordinary course of business less estimated costs necessary to make the sale. Any write-down of materials and supplies to NRV is recognized as an expense in statement of comprehensive income in the year incurred.

Deferred Containers

Deferred containers are recognized upon the purchase of bottles, pallets and shells. This represents the cost of inventories not covered by the deposit value. Deferred containers are carried at cost less accumulated amortization and any impairment in value.

Deferred containers are amortized over 4 years using the straight-line method to allocate the cost of bottles, pallets and shells over its estimated useful life.

Property, Plant and Equipment

Property, plant and equipment, except for land, are carried at cost less accumulated depreciation, depletion and any impairment in value. Land is carried at cost.

The initial cost of property, plant and equipment consists of construction cost, and its purchase price, including import duties and nonrefundable purchase taxes and any directly attributable costs of bringing the asset to the location and condition for its intended use. Subsequent costs that can be measured reliably are added to the carrying amount of the asset when it is probable that future economic benefits associated with the asset will flow to the Group. The costs of day-to-day servicing of an asset are recognized as an expense in the period in which they are incurred.

Each part of an item of property and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

Depreciation on property, plant and equipment is calculated using the straight-line method to allocate the cost of each asset less its residual value over its estimated useful life.

The average estimated useful lives of property, plant and equipment are as follows:

Category	Number of Years
Machineries and equipment	10
Building	15-20
Leasehold improvement	5 or lease term, whichever is shorter
Vehicles	5
Waste water facility	2-5
Tools	3
Laboratory equipment	2
Office and other equipment	2-3

The useful lives and depreciation method are reviewed periodically to ensure that the periods and method of depreciation are consistent with the expected pattern of economic benefits from items of property and equipment.

When assets are disposed of, or are permanently withdrawn from use and no future economic benefits are expected from their disposals, the cost and accumulated depreciation and impairment losses, if any, are removed from the accounts and any resulting gain or loss arising from the retirement or disposal is recognized in profit or loss.

Fully depreciated property plant and equipment are retained in the accounts until these are no longer in use.

Impairment of Nonfinancial Assets

Property, plant and equipment and deferred containers are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If any such indication exists and where the carrying amount of an asset exceeds its estimated recoverable amount, the asset or cash generating unit (CGU) is written down to its recoverable amount. The estimated recoverable amount is the higher of fair value less cost to sell and value in use. The fair value less cost to sell is the amount obtainable from the sale of an asset in an arm's length transaction less the costs of disposal while value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the non-financial asset. For an asset that does not generate largely independent cash inflows, the estimated recoverable amount is determined for the CGU to which the asset belongs. Impairment losses are recognized in the profit or loss.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. The Group used value in use to assess the recoverable amount of an asset.

Recovery of impairment losses recognized in prior years is recorded when there is an indication that the impairment losses recognized for the asset no longer exist or have decreased. The recovery is recorded in the statement of comprehensive income. However, the increased carrying amount of an asset due to a recovery of an impairment loss is recognized to the extent it does not exceed the carrying amount that would have been determined (net of depreciation) had no impairment loss been recognized for that asset in prior years.

Input Value-Added Tax (VAT)

Input VAT represents VAT imposed to the Group by its suppliers for the acquisition of goods and services as required by the Philippine taxation laws and regulations.

Input taxes, which are included under the "Other noncurrent assets" account in the statement of financial position and stated at their estimated net realizable value, will be used to offset against the Group's output VAT liabilities.

Provisions

Provisions are recognized when (a) the Group has a present obligation (legal or constructive) as a result of a past event; (b) it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and (c) a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

Where the Group expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of comprehensive income, net of any reimbursement.

Capital Stock

The Group has issued capital stock that is classified as equity. Incremental costs directly attributable to the issue of new capital stock are shown in equity as a deduction, net of tax, from the proceeds.

Retained Earnings

The amount included in retained earnings includes profit attributable to the Group's stockholders and reduced by dividends. Dividends are recognized as a liability and deducted from equity when they are declared. Interim dividends are deducted from equity when they are paid. Dividends for the year that are approved after the reporting date are dealt with as an event after the reporting date. Retained earnings may also include effect of changes in accounting policy as may be required by transitional provisions of new accounting standards.

Leases

Determination of Whether an Arrangement Contains a Lease

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement and requires an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset. A reassessment is made after inception of the lease only if one of the following applies:

- (a) There is a change in contractual terms, other than a renewal or extension of the arrangement;
- (b) A renewal option is exercised or extension granted, unless the term of the renewal or extension was initially included in the lease term;
- (c) There is a change in the determination of whether fulfillment is dependent on a specific asset; or,
- (d) There is a substantial change to the asset.

Where a reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gives rise to the reassessment for scenarios (a), (c) or (d) above, and at the date of renewal or extension period for scenario (b).

Operating Leases - The Group as a Lessee

Operating leases represent those leases under which substantially all risks and rewards of ownership of the leased assets remain with the lessors. Lease payments under an operating lease are recognized as an expense in the statement of comprehensive income on a straight-line basis over the lease term.

Retirement Liability

The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Defined benefit costs comprise the following:

- Service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non routine settlements are recognized as expense in profit or loss. Past service costs are recognized when plan amendment or curtailment occurs.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on high quality corporate bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in the statement of comprehensive income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized

immediately in other comprehensive income in the period in which they arise. Remeasurements are not reclassified to profit or loss in subsequent periods. These are retained in other comprehensive income until full settlement of the obligation.

Foreign Currency-denominated Transactions

Transactions in foreign currencies are recorded using the exchange rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated using the rate of exchange at the balance sheet date. Foreign exchange differences between rate at transaction date and rate at settlement date or balance sheet date are recognized in the parent group statement of comprehensive income. Nonmonetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions.

Income Taxes

Current Income Tax

Current tax liabilities for the current and prior periods are measured at the amount expected to be paid to the tax authority. The tax rates and tax laws used to compute the amount are those that have been enacted or substantively enacted as at the reporting date.

Deferred Income Tax

Deferred income tax is provided, using the reporting liability method, on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences. Deferred income tax assets are recognized for all deductible temporary differences, carry forward benefit of unused tax credits to the extent that it is probable that sufficient future taxable profit will be available against which the deductible temporary differences can be utilized.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax assets to be utilized. Unrecognized deferred income tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred income tax assets to be recovered.

Deferred income tax assets and liabilities are measured at the tax rate that is expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at reporting date.

Income tax relating to items recognized directly in equity is recognized in equity and as other comprehensive income in the statement of comprehensive income and not as part of net income.

Contingencies

Contingent liabilities are not recognized in the financial statements. These are disclosed in the notes to financial statements unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the financial statements but disclosed in the notes to financial statements when an inflow of economic benefits is probable.

3. Management's Use of Judgment and Estimates

The preparation of the financial statements in accordance with PFRS requires the Group to make judgments and estimates that affect reported amounts of assets, liabilities, income and expenses and disclosure of contingent assets and contingent liabilities. Future events may occur which will cause the assumptions used in arriving at the estimates to change. The effects of any change in estimates are reflected in the financial statements as they become reasonably determinable.

Judgments, estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results could differ from such estimates.

Judgments

In the process of applying the Group's accounting policies, management has made judgments, apart from those involving estimations, which has the most significant effect on the amounts recognized in the financial statements.

Determining Functional Currency

The Group, based on the relevant economic substance of the underlying circumstances, has determined its functional currency to be the Philippine Peso. It is the currency of the primary economic environment in which the Group primarily operates.

Determining Operating Lease Commitments - Group as Lessee

The Group has determined that the lessor retains all significant risks and rewards of ownership of these properties. These lease agreements are accounted for as operating leases.

Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets within the next financial year are discussed below.

Estimating Impairment Losses on Receivables

The Group assesses at each reporting date whether there is any objective evidence that receivables are impaired. To determine whether there is objective evidence of impairment, the Group considers factors such as the probability of insolvency or significant financial difficulties of the affiliated companies and default or significant delay in payments. Where there is objective evidence of impairment, the amount and timing of future cash flows are estimated based on age and status of the financial asset, as well as historical loss experience. Allowance for impairment loss is provided when management believes that the receivable balance cannot be collected or realized after exhausting all efforts and courses of action.

In addition to specific allowance against individually significant loans and receivables, the Group also makes a collective impairment allowance against exposures which, although not specifically identified as requiring a specific allowance, have a greater risk of default than when originally granted. This collective allowance is based on any deterioration in the Group's assessment of the accounts since their inception. The Group's assessments take into consideration factors such as any deterioration in country risk and industry, as well as identified structural weaknesses or deterioration in cash flows.

As of March 31, 2016 and December 31, 2015, trade and other receivables, net of allowance for probable losses, amounted to ₱421.29 million and ₱370.40 million, respectively. Allowance for probable losses on receivables amounted to ₱1.23 million as of March 31, 2016.

Estimating Useful Lives of Property, Plant and Equipment

The Group estimates the useful lives of property, plant and equipment based on the period over which the assets are expected to be available for use. The estimated useful lives of property, plant and equipment are reviewed periodically and are updated if expectations differ from previous estimates based on factors that include asset utilization, internal technical evaluation, technological changes, environmental and anticipated use of the assets tempered by related industry benchmark information. It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in factors mentioned above. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances.

The Group recognized depreciation expense amounting to ₱62.91 million and ₱62.66 million as at March 31, 2016 and 2015, respectively. The carrying amounts of property, plant and equipment

amounted to ₱1.25 billion and ₱1.18 billion as of March 31, 2016 and December 31, 2015, respectively.

Estimating Useful Lives of Deferred Containers

The Group estimates the useful lives of deferred containers based on the trip lives of containers which is three years. The estimated useful lives of deferred containers are based on industry practice and are reviewed periodically as determined by management based on the containers profile and optimal float analyses conducted by the Group. Change in accounting estimates shall be recognized prospectively in the statements of comprehensive income.

The Group recognized amortization expense amounting to ₱194.43 million and ₱155.17 million as at March 31, 2016 and 2015, respectively. The carrying amounts of deferred containers as of March 31, 2016 and December 31, 2015 amounted to ₱1.92 billion and ₱2.02 billion, respectively.

Estimating Pension Cost

The determination of the Group's obligation and cost for pension benefits is dependent on the selection of certain assumptions used by actuaries in calculating such amounts. In accordance with Revised PAS 19, *Employee Benefits*, actual results that differ from the Group's assumptions are accumulated and amortized over future periods and therefore, generally affect the Group's recognized expense and recorded obligation in such future periods. While management believes that its assumptions are reasonable and appropriate, significant differences in actual experience or significant changes in the assumptions may materially affect the Group's pension and other pension obligations.

4. Seasonality of Operations

Similar to other beverage group, the group's sales are subject to seasonality. Sales are at a peak during summer from March through June and lower during the rainy season of July to October. Higher sales are likewise experienced around the Christmas/New Year period in the middle of December through early January. These may cause the Group's results to fluctuate. In addition, the Group's performance may be affected by unforeseen events such as production interruptions. Consequently, comparisons of Sales and operating results between periods within a single year, or between different periods in different financial years may be pointless and should not be relied upon as indicators.

5. Financial Risk Management and Capital Management

The Group's financial instruments consist mainly of cash and cash equivalents, trade and other receivables, due to and from related parties, short-term loans payable, trade and other payables excluding statutory payables. The main purpose of the Group's dealings in financial instruments is to fund its operations and capital expenditures.

The risks arising from the Group's financial instruments are credit risk, liquidity risk and foreign exchange risk.

The BOD has the overall responsibility for the establishment and oversight of the Group's risk management policies. The Finance & Accounting Manager is responsible for developing and monitoring the Group's risk management policies. Issues affecting the operations of the Group are reported regularly to the BOD.

Management addresses the risks faced by the Group in the preparation of its annual operating budget. Mitigating strategies and procedures are also devised to address the risks that inevitably occur so as not to affect the Group's operations and forecasted results. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

Credit Risk

Credit risk is the risk of financial loss to the Group if counterparty to a financial instrument fails to meet its contractual obligations. The Group's credit risk exposure arises principally from the possibility that the counterparties may fail to fulfill their agreed obligations. To manage such risk, the Group monitors its receivables on an ongoing basis. The objective is to reduce the risk of loss through default of counterparties.

The Group establishes an allowance for impairment that represents its estimate of incurred losses in respect of receivables. The main components of this allowance are specific loss component that relates to individually significant exposures, and a collective loss component established for groups of similar assets in respect of losses that have been incurred but not yet identified. The collective allowance is determined based on historical data of payment statistics for similar financial assets.

With respect to credit risk arising from the financial assets of the Group, which comprise cash and cash equivalents and receivables, the Group's exposure to credit risk arises from a possible default of the counterparties with a maximum exposure equal to the carrying amounts of these instruments.

The tables below show the credit quality by class of financial assets.

	March 31, 2016				
	Neither Past Due Nor impaired		Past Due but	Impaired	Total
	High Grade	Standard Grade	not Impaired		
Cash and cash equivalents*	1,555,385,927	-	-	-	1,555,385,927
Trade and other receivables	-	421,286,810	-	1,233,310	422,520,120
Total credit risk exposure	1,555,385,927	421,286,810	-	1,233,310	1,977,906,047

*Excluding cash on hand

	December 31, 2015				
	Neither Past Due Nor impaired		Past Due but	Impaired	Total
	High Grade	Standard Grade	not Impaired		
Cash and cash equivalents*	934,077,766	-	-	-	934,077,766
Trade and other receivables	-	370,397,142	-	1,233,310	371,630,452
Total credit risk exposure	934,077,766	370,397,142	-	1,233,310	1,305,708,218

*excluding cash on hand

The Group has assessed the credit quality of the following financial assets:

1. Cash and cash equivalents are assessed as high grade since these are deposited with reputable banks.
2. Trade and other receivables, which pertain mainly to receivables from related parties, officers and employees and others, were assessed as standard grade since there were no history of default on the outstanding receivables as of March 31, 2016 and December 31, 2015. These were assessed based on past collection experience and the debtors' ability to pay the receivables.

The tables below show the aging analysis per class of financial assets as at March 31, 2016 and December 31, 2015.

March 31, 2016						
	Neither past due nor impaired	1-30 Days	31-60 Days	More than 60 days	Impaired	Total
Cash and cash equivalents	1,607,101,178					1,607,101,178
Trade and other receivables	169,901,010	24,445,871	7,645,772	219,294,156	1,233,310	422,520,120

	1,162,564,651	22,286,360	10,899,617	227,821,419	1,233,310	1,424,805,356

Liquidity Risk

Liquidity risk is the risk that the Group will be unable to meet its obligations as they fall due. To effectively manage liquidity risk, the Group has arranged for funding from related parties and continues to dispose of scrap, obsolete and excess assets to raise additional funds aside from the capital restructuring completed in 2008.

The following are the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements:

March 31, 2016	Due and Demandable	Within 6 Months	6 to 12 Months	Over 1 Year	Total
Trade and other payables	2,415,401,728	112,562,480			2,527,964,209
Short-term loans payable		561,652,744			561,652,744
	2,415,401,728	674,215,224	-	-	3,089,616,952

**Excluding statutory payables*

December 31, 2015	Due and Demandable	Within 6 Months	6 to 12 Months	Over 1 Year	Total
Trade and other payables	2,533,174,470				2,533,174,470
Short-term loans payable		497,439,728			497,439,728
	2,533,174,470	497,439,728	-	-	3,030,614,198

**Excluding statutory payables*

Foreign Exchange Risk

Foreign exchange risk is the risk to earnings or capital arising from changes in foreign exchange rates. The Group uses the Peso (₱) as its functional currency and is therefore exposed to foreign exchange movements, primarily on the US Dollar (\$). The Group follows a policy to manage this risk by closely monitoring its cash flow position and by providing forecast on its exposures in non-peso currency.

The balances of the Group's financial assets and liabilities denominated in foreign currency translated in Philippine peso, as of March 31, 2016 and December 31, 2015, are as follow

	March 31, 2016							
	Original Currency in \$		Translated in ₱		Original Currency in €		Translated in ₱	
Financial asset:								
Cash and cash equivalents	\$	582,147	Php	26,841,640	€	12,335	Php	644,604
Financial liabilities:								
Trade and other payables	\$	(2,361,085)		(108,864,904)				
Net exposure	\$	(1,778,938)	Php	(82,023,264)	€	12,335	Php	644,604

	December 31, 2015							
	Original Currency in \$		Translated in ₱		Original Currency in €		Translated in ₱	
Financial asset:								
Cash and cash equivalents	\$	307,926	Php	14,490,998	€	74,502	Php	3,854,815
Financial liabilities:								
Trade and other payables	\$	(1,699,988)		(80,001,417)				
Net exposure	\$	(1,392,062)	Php	(65,510,419)	€	74,502	Php	3,854,815

As of March 31, 2016 and December 31, 2015, the exchange rate of the Philippine peso to USD is ₱46.11 and ₱47.06, respectively, while the exchange rate for EUR as of March 31, 2016 and December 31, 2015 is ₱52.26 and ₱51.74, respectively.

The following table demonstrates the sensitivity to a reasonably possible change in Philippine Peso/US Dollar exchange rate, with all other variables held constant, of the Group's income before income tax. There is no other impact on the Group's equity other than those affecting the statement of comprehensive income.

	Change in exchange rate		Change in exchange rate	
	\$ strengthens by 5%	\$ weakens by 5%	€ strengthens by 5%	€ weakens by 5%
Increase (decrease) in income before income tax and equity				
March 31, 2016	(4,101,163)	4,101,163	32,230	(32,230)
December 31, 2015	(3,275,521)	3,275,521	192,741	(192,741)

Fair Values of Financial Instruments

Fair value is defined as the amount at which the financial instruments could be exchanged in a current transaction between knowledgeable willing parties in an arm's length transaction, other than in a forced liquidation or sale. Fair values are obtained from quoted market prices, discounted cash flow models and option pricing models, as appropriate.

The following financial assets and financial liabilities approximate their values as at reporting dates:

Cash and cash equivalents

The carrying amounts of cash and cash equivalents approximate their fair value due to the short term maturity of these financial instruments.

Trade and other receivables, Short-term loans payable and Trade and other payables Similarly, the carrying amounts of trade and other receivable, short-term loans payable and trade and other payables, which are all subject to normal trade terms, approximate their fair values.

Deposit with suppliers

These are presented at cost since the timing and amounts of future cash flows related to the deposit with suppliers are linked to the termination of the contract which cannot be reasonably and reliably estimated.

Fair Value Hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

Capital Management

The Group maintains a capital base to cover risks inherent in the business. The primary objective of the Group's capital management is to increase the value of shareholders' investment. The Group sets strategies with the objective of establishing a versatile and resourceful financial management and capital structure upon commencement of its operations.

The BOD has overall responsibility for monitoring of capital in proportion to risk. Profiles for capital ratios are set in the light of changes in the Group's external environment and the risks underlying the Group's business operations and industry. No changes were made in the objectives, policies or processes during the year.

The following table summarizes what the Group considers as its total capital as at reporting dates:

	March 31, 2016	December 31, 2015
Capital Stock	₱ 1,068,393,223	₱ 1,068,393,223
Additional Paid in Capital	1,153,568,289	1,153,568,289
Retained Earnings	2,284,833,894	1,849,645,739
	₱ 4,506,795,406	₱ 4,071,607,251

6. Subsequent Events

On April 8, 2016, the Board of Directors ("BOD") of the Parent Company approved the increase in authorized capital stock by P800 million through the increase of common shares by 800,000,000 shares with a par value of ₱1. At the same time, the BOD approved the declaration of a stock dividend equivalent to 21% of issued and outstanding common shares, to be issued out of the aforementioned increase in authorized capital stock. On the same day, the BOD of the Parent Company approved the declaration of cash dividends of ₱0.12 per share in favour of stockholders on record as of April 29, 2016.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Results of Operations

The Group delivered strong top line performance by hitting ₱2.79 billion net revenue for the quarter which is 10.0% higher than the same period last year, driven by growth across major brands. The completion of additional production lines in the middle of 2015 at Kaybiga, Pampanga and Isabela plants has enabled the Group to support continuing demands particularly flavored carbonated soft drinks. In addition, price adjustments on certain product categories implemented during summer of 2015 contributed to the revenue growth.

Cost of sales which consists mainly of Raw and Packaging Materials, Direct Labor and Factory Overhead, increased by 10.9% versus same period last year. These were mainly attributable to volume growth, significant increase of sugar cost and concentrate, and higher amortization due to infusion of new bottles; moderated by the downward movement of diesel cost, crowns, caps and CO₂. Consequently, gross profit reached ₱960 million, an increase of ₱73 million versus last year. As percentage to revenue, gross profit rate decreased slightly at 34.4% from 34.9% last year.

Selling, marketing and distribution expenses increased by 10.9% from ₱242 million to ₱268 million in the same quarter last year primarily due to increased advertising campaign, higher manning and outside manpower services that supported sales growth, and depreciation due to re-fleeting program; these increases were partially offset by lower transportation and travel expenses due to significant decline in oil prices.

General and administrative expenses slightly decreased to ₱76 million from ₱80 million last year due to lower professional fees and business permit penalties which were incurred in 2015. Operating expenses expressed as percentage to revenue remains manageable at 12% which is at the same level with the first quarter of the previous year.

Other income decreased by ₱17 million attributable to interest on loans, foreign exchange losses and lower miscellaneous income compared to same period last year.

Provision for income tax increased by 4% for the quarter compared last year primarily due to the increase in taxable income.

Overall, the Group managed to post a net income of ₱435 million for the quarter which improved by 6.6% compared to year ago level.

Financial Condition

Sound policy on credit control and working capital management has enabled the Group to maintain a solid financial condition. Cash from operations were used to fund capital expenditures.

The Group's total assets increased by 8.9%, from ₱7.4 billion in December 2015 to ₱8 billion as of March 2016 mainly due to increased cash and cash equivalents, trade and other receivables, inventories, property plant & equipment, and other non-current assets.

Cash and cash equivalents increased from ₱1.1 billion to ₱1.6 billion due to net cash inflows generated from operations.

Trade and other receivables increased by ₱51 million brought about by higher sales transaction that supported the sales growth.

Inventories are higher by ₱83 million or 4.3% versus 2015 mainly due to higher purchases of resin and spare parts.

Property, plant and equipment increased by ₱70 million due to planned capital expenditures on bottling equipment and machineries as well as ongoing plant construction.

Deferred containers decreased from ₱2.0 billion to ₱1.9 billion on account of higher amortization.

Other non-current assets increased from ₱725 million to ₱761 million primarily due to higher deposit on importation.

Total liabilities increased from ₱3.36 billion in December 2015 to ₱3.58 billion in March 2016 mainly due to due short-term loans payable on importation and income tax payable for year ending 2015 (paid in April 2016) and the 1st Quarter 2016 (payable in May, 2016).

Trade and other payables decreased by ₱37 million due to settlement of obligations.

Short-term loans payable increased by ₱64 million due to higher importation of resin, spare parts and raw materials.

Retirement liability also increased by ₱5.3 million representing accruals for the first quarter of 2015.

Seasonality Aspects That May Affect Financial Conditions or Results of Operations

Please refer to Note 4 of the Consolidated Interim Financial Statements for discussions on seasonality of the Group's operations.

Key Performance indicators

The following are the Group's key performance indicators. Analyses are employed by comparisons and measurements based on the financial data of the current period against the same period of previous year.

		31-Mar-16	31-Dec-15
Current ratio	Current assets over current liabilities	1.16:1	1.04:1
Solvency ratio	Net income plus depreciation and amortization over total liabilities	.77:1	.81:1
Bank debt-to-equity ratio	Bank debt over total equity	.13:1	.12:1
Asset-to-equity ratio	Total assets over equity	1.80:1	1.83:1

		For the three months ended March 31	
		2016	2015
Gross sales		P 2.79 Billion	P 2.54 Billion
Gross profit margin	Gross profit over net sales	34.40%	34.94%
Operating margin	Operating income over net sales	22.07%	22.23%
Net profit margin	Net profit over net sales	15.60%	16.10%

Current ratio increased mainly due to the increase in cash and cash equivalents as a result of inflows generated from operations. The change in solvency ratio is attributed to the increase in net income, depreciation, amortization and total liabilities. Debt to equity ratio increased due to the increase in short-term loan and total equity. Asset to equity ratio remained stable as the increase in total assets resulted also to the increase in total equity.

The changes in operating margin and net profit margin were attributable to the increases in operating income and net income relative to the increase in revenue driven by volume and price adjustments.
